

Change your cookie settings

You can allow or block cookies saved by websites.

Note: If you don't allow sites to save cookies, most sites that require you to sign in won't work.

Allow or block cookies

Allow or block cookies for a specific site

If you allow cookies by default, you can still block them for a certain site.

1. On your computer, open Chrome.
2. At the top right, click More  > **Settings**.
3. Under "Privacy and security," click **Cookies and other site data**.
4. Next to "Sites that can always use cookies," "Always clear cookies when windows are closed," or "Sites that never use cookies," click **Add**.
5. Enter the web address.
 - To create an exception for an entire domain, insert `[*.]` before the domain name. For example, `[*.]google.com` will match `drive.google.com` and `calendar.google.com`.
 - You can also put an IP address or a web address that doesn't start with `http://`.
6. Select **Add**.

To remove an exception you don't want any more, to the right of the website, click More  > **Remove**.

Note: If you're using your Chromebook at work or school, you might not be able to change this setting. For more help, [contact your administrator](#).

`[*.]factivation.com`
